BAEHR®

In 1949

the foundation stone is laid for a company that continues to enjoy success today: Hamburg businessman Gustav Baehr establishes the company "Technik Baehr" in Waiblingen, Germany. The company's first clients were goldsmiths and dentists. Over time, this list grew to include podiatrist and cosmetician.

In 1977

sons Elmar and Dieter Baehr take over the company and continue to guide it down a course of expansion.

By 2014

the one-man company has grown into a large, ambitious enterprise with a staff of over 100 employees, a successful presence all over Germany and numerous international partnerships.

In 1969

"Gustav Baehr GmbH" was created on the foundations laid by the company "Technik Baehr", which, by then, had gone on to greatly expand its offerings, services and assortment.

In 2006

Managing Director Michael Ladwig successfully continues to lead BAEHR into the future. The family company has become one of the leading providers on the foot care and cosmetics market.

In 2018

the acquisition of additional huge warehouse areas greatly increase the company's capacities. For our customers, this means a future with more availability, faster deliveries, a larger and more diverse assortment as well as smooth and rapid order processing.

Accolades 2017

Accolades 2015/2016

In 2017

over 70,000 readers cast their vote and help us bring all three of the products we submitted for the competition onto the winner's podium. For the second year in a row, the BAEHR TEC A 2000 took first place at the BEAUTY FORUM Readers' Choice Award 2017 in the category of foot care devices and cabins. Yet another fantastic confirmation of the uniqueness of our products and an enormous source of motivation for our company.

Professional care and wellness for feet

PEDIBAEHR foot care products

A desire for individualised care and wellness has long since also become a reality in the area of foot care.

And rightly so: our feet deserve even more attention since they literally carry us through life, no matter whether in high heels or comfortable tennis shoes. Promoting healthy feet at every age is a worthwhile goal and one to which your practical expertise makes a significant contribution every day. We would like to offer you the support of our own expertise and our professional "PEDIBAEHR" care products.

The benefits for you

- accord to EU regulation 1223-2009 on cosmetic products
- modern, proven and intelligently combined active ingredients
- a complete range of solutions for all problem areas relating to foot care
- all PEDIBAEHR care products are dermatologically tested
- pleasant scent
- Made in Germany

Fissure foot balm with Echinacea

Care for extremely dry skin and cracks

- ideally suited for treating brittle, cracked and severely callused skin
- excellent skin treatment characteristics for cases of excessive callus formation
- absorbs quickly
- leaves skin smooth and supple
- dermatologically tested

Use: Apply and massage onto the skin in the morning and evening, paying particular attention to the soles (also ideal for elbow care)

Ingredients: (excerpt) echinacea, bisabolol, glycerine, farnesol

Art. no.	Product name	Volume
10803	Fissure foot balm tube	30 ml
10800	Fissure foot balm tube in folding carton	75 ml
10806	Fissure foot balm tube in folding carton	125 ml
NEW 11550	Fissure foot balm medical practice dosage with integrated pump; Available as of June 2018	500 ml

NEW 11587	Deer tallow cream medical practice dosage with integrated pump; Available as of May 2018	500 ml
10985	Deer tallow cream medical practice dosage without pump	450 ml
10873	Dosing pump for 450 ml medical practice dosage	

Regenerating cream with cold-pressed olive oil

Care for very dry skin on the feet

- this rich foot cream protects the skin, especially from drying out
- high-quality cold-pressed olive oil, shea butter and panthenol provide the skin with an optimal degree of moisture and guarantee the perfect skin care results
- the skin's own protective barrier is normalised and stabilised
- rough, cracked skin and heels are made soft and supple once again
- the foot cream is free of PEGs parabens, paraffin, silicon and colouring ingredients
- dermatologically tested, also suitable for sensitive skin

Use: Apply several times daily as needed

Ingredients: (excerpt) olive oil, karité (shea butter), panthenol

Art. no.	Product name	Volume
11041	Regeneration cream tube	30 ml
11040	Regeneration cream tube in folding carton	125 ml
NEW 11556	Regeneration cream medical practice dosage with integrated pump; Available as of February 2018	500 ml
11042	Regeneration cream medical practice dosage without pump	450 ml
10873	Dosing pump for 450-ml medical practice dosages	

Rose cream

Care for dry, cracked skin

- high-quality ingredients including urea, shea butter and wild rose oil provide care for dry, cracked skin on the feet and restore softness and suppleness
- immediately moisturises and supports the regeneration of stressed, hard and brittle skin
- enjoy the pleasant feeling of cared-for feet and take in the subtle, refreshing scent of rose
- dermatologically tested

Use: Apply even and massage in every evening; for extremely dry skin, also use in the morning. Apply more generously to highly callused or cracked areas.

Ingredients: (excerpt) urea, karité (shea butter), rose oil

Art. no.	Product name	Volume
11061	Rose cream tube	30 ml

Protects and provides care, especially made for diabetics

Designed for sensitive skin on the feet of people with diabetes or those with extremely dry skin that is prone to cracking – we have exactly the right care product for you and your customers in our assortment. The following four products were specially created for diabetics. The PEDIBAEHR cream foams are an ideal solution for prophylactic measures for the feet of diabetics and other high-risk patients. They can be dosed hygienically and economically, are easy to apply and quickly absorbed. Compression stockings can immediately be put back on.

Protective cream with 10% urea

Care for dry, sensitive skin prone to pressure marks

- also suited for diabetics
- improves the skin's ability to retain moisture, reduces transepidermal water loss and leaves skin smooth and supple
- skin-friendly active ingredients such as bisabolol and panthenol provide care for sensitive, reddened skin prone to pressure marks
- dermatologically tested

Use: Apply and massage in well in the morning and evening

Ingredients: (excerpt) urea 10%, macadamia nut oil, hyaluronic acid, hempseed oil, glycerine, glycyrrhizic acid, bisabolol

Art. no.	Product name	Volume
10863	Protective cream tube	30 ml
10860	Protective cream tube in folding carton	75 ml
10866	Protective cream tube in folding carton	125 ml
NEW 10862	Protective cream medical practice dosage with integrated pump; Available as of April 2018	500 ml
10865	Protective cream medical practice dosage without pump	450 ml
10873	Dosing pump for 450 ml medical practice dosage	

Hydro-balm with lavender

Care for dry and rough skin

- lavender oil with deodorising, soothing and protective characteristics releases a soft and relaxing scent
- the skin's moisture is effectively increased by way of sodium PCA, one of the skin's natural moisturising components, along with the skin care ingredient allantoin
- delightful evening primrose oil offers a beneficial fatty acid spectrum for tending to dry and rough skin
- mild apricot kernel oil and light soy oil provide gentle skin care and imbue suppleness
- the velvety light texture is quickly absorbed and leaves a smooth and soft feeling on the skin
- dermatologically tested

Use: Apply and massage in every morning and evening

Ingredients: (excerpt) sodium PCA, lavender oil, night primrose oil, apricot kernel oil

Art. no.	Product name	Volume
11068	Hydro-balm tube	30 ml
11086	Hydro-balm tube in folding carton	125 ml

Cream foam with edelweiss, 10% urea

Care for very dry and sensitive skin

- also suited for diabetics
- absorbs quickly and completely
- compression stockings can be put back on immediately after applying
- urea provides moisture retention and protects skin from drying out
- edelweiss extract and panthenol provide care and leave skin smooth
- free of fragrances, colouring agents and preservatives
- dermatologically tested

Use: Shake dosage well prior to each use and hold upright when dispensing. Use sparingly once or twice per day and softly massage in.

Ingredients: (excerpt) urea 10%, edelweiss extract, glycerine, peach kernel oil, panthenol, hyaluronic acid

Art. no.	Product name	Volume
10853	Cream foam dosage	35 ml
10961	Cream foam dosage	125 ml
10858	Cream foam medical practice dosage	300 ml

Cream foam with clotrimazole, 10% urea

Care for dry skin sensitive to fungus

- also suited for diabetics
- clotrimazole has a prophylactic protective function beneficial for the skin of diabetics which is less resistant to the build-up of fungus
- urea promotes moisture retention
- healing ingredients imbue skin with the needed suppleness
- free of fragrances, colouring agents and preservatives
- dermatologically tested

Use: Shake dosage well prior to each use and hold upright when dispensing. Use sparingly once or twice per day and softly massage in.

Ingredients: (excerpt) urea 10%, clotrimazole, glycerine, peach kernel oil, panthenol, hyaluronic acid

Art. no.	Product name	Volume
10851	Cream foam dosage	35 ml
10960	Cream foam dosage	125 ml

First-class level of skin friendliness

dermatest® approved: PEDIBAEHR rose cream foam with urea is very well tolerated by skin in accordance with clinical-dermatological criteria. Skin friendliness was also tested on individuals with diabetes.

Rose cream foam

Care for dry and rough skin

- fine cream foam for extremely dry and rough feet
- absorbs quickly and completely; compression stockings can immediately be put back on after applying
- urea (10%) and hyaluronic acid provide skin with moisture
- peach kernel oil and glycerine heal skin and leave it supple
- valuable pure rose oil from the Damask rose has a soothing effect
- regular use reduces thickness of calluses
- free of preservatives

Use: Shake dosage well prior to each use and hold upright when dispensing. Use sparingly once or twice per day and softly massage in.

Ingredients: (excerpt) urea 10 %, peach kernel oil, rose oil, hyaluronic acid

Art. no.	Product name	Volume
10972	Cream foam dosage	35 ml
10970	Cream foam dosage	125 ml
10971	Cream foam medical practice dosage	300 ml

Skin friendliness clinically tested via commissioned examination by dermatest® GmbH, 11/2013
* 20 test subjects (** 5 test subjects) application 2 x daily on the foot over a period of 4 weeks.

boosts skin moisture by an average of 39.7%*

reduces callus thickness by an average of 28.5%**

increases skin suppleness by an average of 21.6*

Propolis cream foam

Care for sensitive feet

- propolis, the resin produced by bees, provides especially beneficial foot care with ingredients that include essential oils, bee's wax, vitamins, flavonoids and trace elements
- propolis has a regenerative, calming and soothing effect and restores balance to the skin flora
- reduces hardening caused by calluses and cracks
- leaves cracked and stressed skin soft and supple
- free of fragrances and colouring agents
- dermatologically tested

Use: Shake dosage well prior to each use and hold upright when dispensing. Use sparingly once or twice per day and softly massage in.

Ingredients: (excerpt) jojoba oil, almond oil, glycerine, propolis extract 3%

Art. no.	Product name	Volume
10967	Cream foam dosage	35 ml
10968	Cream foam dosage	125 ml
10969	Cream foam medical practice dosage	300 ml

Effective care for dry feet

dermatologically tested

PEDIBAEHR fruit cream foam with an exotic and stimulating scent. Effectively boosts the skin's moisture, as proven in a 4-week study on the feet of diabetics as well as one on the product's skin friendliness.

The highly moisturising effect of PEDIBAEHR fruit cream foam stems from its valuable ingredients:

the presence of components found in the skin's own protective barrier, glycerine and urea (5%), also called natural moisturising factors (NMFs), effectively boosts and maintains the skin's moisture content. Additional valuable ingredients, such as panthenol and allantoin, calm and soothe the skin. The cream foam is free of colouring agents and proves to be especially friendly to the skin due to its natural, PEG-free emulsifying system.

Peach kernel oil (prunus persica kernel oil): This mild oil contains many unsaturated fatty acids, such as oleic acids and linoleic acids and is suited for all skin types. It also functions as an antioxidant thanks to the inclusion of tocopherol.

Mango fruit extract (mangifera indica): The extract of the mango fruit contains protein and carbohydrates, vitamin C and B1 as well as phenol derivatives such as gallic acid and mangiferin. These ingredients have an antioxidative and anti-inflammatory effect. Taken together, this provides for optimum skin protection.

Mango butter (mangifera indica seed butter) This solid butter contains sterols and squalene, the components that make up the skin's natural protective barrier. Mango butter makes skin soft and supple and also supports regeneration.

Avocado oil (persea gratissima): This highly effective oil derived from fruit pulp of ripe avocados contains many unsaponifiable components such as palmitoleic acid. Avocado oil serves to strengthen the skin's protective barrier and is ideally suited for taking care of dry and cracked skin.

boosts the skin's moisture by 41.6% on average*

Fruit cream foam with mango butter and peach kernel oil

fine cream foam with select essences derived from mango and peach

- for soft and well-kept feet featuring an exotic and stimulating scent
- botanical glycerine and 5% urea provide for optimal moisture penetration by increasing the skin's water-binding capacity. Skin moisture is noticeably boosted.
- butter from fine mango and avocado protects and coats strained and cracked skin on the feet.
- tried-and-tested panthenol provides care and support for skin regeneration
- free of colouring agents, with a natural, PEG-free emulsifying system
- suitable for diabetics, dermatologically tested

Use: Shake dosage well before every use and hold upright when dispensing. Use sparingly once or twice per day and softly massage in.

Valuable balm for feet

Propolis, the resin produced by bees, includes valuable ingredients such as essential oils, bee's wax, vitamins, flavonoids and trace elements. It has a regenerative, calming and soothing effect and restores balance to the skin flora. Since propolis is not water soluble, it remains on the skin as a protective layer. Even sensitive areas of the skin enjoy protection. Cracked, strained skin, as well as thickened nails, receive intensive care.

Foot balm with propolis, free of fragrances

Care for cracked and strained skin

- propolis, the resin produced by bees, provides especially beneficial foot care through ingredients that include essential oils, bee's wax, vitamins, flavonoids and trace elements
- propolis has a regenerative, calming and soothing effect and restores balance to the skin flora
- reduces hardening caused by calluses and cracks
- leaves cracked and stressed skin soft and supple
- ideally suited for daily care and foot massages on all skin types
- dermatologically tested

Use: Apply a thin layer daily and massage in. Not to be used on young children. Avoid contact with eyes and mucus membranes. May cause allergic reactions.

Ingredients: (excerpt) propolis extract 6%, almond oil, jojoba oil

Refreshing care for sweaty feet

Excessive sweating not only leads to uncomfortable foot odour, it also increases the risk of skin infections. The PEDIBAEHR foot deodorising products normalise sweating, have a deodorising effect and protect the skin.

Foot deodorising balm with farnesol

Care for excessively sweaty feet

- balm with farnesol, a natural deodoriser
- reliably reduces excessive sweating of the feet and foot odours with a long-lasting effect
- farnesol balances skin flora and prevents the onset of foot fungus
- allantoin and D panthenol soothe the skin

Use: Apply and massage in every morning and evening.

Ingredients: (excerpt) farnesol, aluminium chlorohydrate, panthenol, macadamia nut oil

PEDIBAEHR wellness – unique skin care results for your feet!

Fruit foot peeling with sugar and fine pearls made of jojoba wax

- thoroughly cleanses the skin without irritation and reliably removes excessive skin flakes
- avocado oil provides a oil-restoring effect while urea and vegetable glycerine nurtures dry, brittle skin and protects it against drying out
- a mango fruit extract imparts energy while also revitalising and regenerating
- valuable peach kernel oil, mango butter and Yucatan honey soothe skin and make it supple
- leaves skin feeling smooth and velvety soft
- ideally suited as preparation before applying fruit foot cream or a paraffin treatment
- dermatologically tested

Use: Apply to skin, massage in, softly rub off and thoroughly rinse off.

A total of 60,000 readers cast their vote and helped all four of the products we submitted for the competition achieve 1st place at the BEAUTY FORUM Readers' Choice Award 2016/2016. This was a fantastic confirmation of the uniqueness of our products and an enormous source of motivation for our company.

Exceptional care for your feet!

Effective foot care provided by the velvety PEDIBAEHR fruit foot cream with mango butter and peach kernel oil fights dry and rough skin on the feet. An excellent mix of ingredients make our fruit foot cream into a true wellness experience and leave feet soft and supple. Foot wellness begins with dermatologically tested skin friendliness. The 5-star seal by dermatest® was awarded to our fruit foot cream due to its excellent skin friendliness. The product was tested over a period of two weeks and subject to clinical-dermatological conditions with two applications per day. This skin friendliness study by dermatest® also included diabetics.

The especially nurturing effect of PEDIBAEHR fruit foot cream draws its effectiveness from valuable ingredients:

boosts skin moisture by an average of 41.6%*

reduces callus thickness by an average of 30.2%**

increases skin smoothness by an average of 23.2%*

Peach kernel oil (*prunus persica*) contains numerous unsaturated fatty acids, including oleic acids and linoleic acids, and it is suitable for all skin types. It also functions as an antioxidant thanks to the inclusion of tocopherol. It not only has a pleasant scent but also provides delicate skin care.

Mango fruit extract (*mangifera indica*) contains protein and carbohydrates, vitamins including C and B1, as well as derivatives such as gallic acid and mangiferin. These ingredients offer an antioxidative and anti-inflammatory effect. Taken together, this provides for optimum skin protection.

Mango butter (*mangifera indica* seed butter) provides for rich skin without leaving any greasy residue. It also contains sterols and squalene, the components that make up the skin's natural protective barrier. Mango butter makes skin soft and supple and also supports regeneration.

Avocado oil (*persea gratissima*) contains many unsaponifiable components such as palmitoleic acid. This cream contains a 5-10% portion of palmitoleic acid, a substance that can also be found in the vernix of newborn babies, Avocado oil serves to strengthen the skin's protective barrier and is ideally suited for tending to dry and cracked skin.

Further valuable ingredients such as panthenol, bisabolol and allantoin support regeneration and soothe the skin. Components found in the skin's protective barrier, such as glycerine and urea, also known as natural moisturising factors, improve moisture content in the skin.

The fruity foot wellness experience can be further perfected by applying a PEDIBAEHR wellness foot peeling before use. This fruity foot peeling thoroughly cleanses the skin using sugar and fine jojoba wax pearls without causing any irritation. Excessive skin flakes are removed and valuable ingredients such as peach kernel oil, mango butter, mango fruit extract and avocado oil delicately nurture the skin. Skin is left feeling velvety smooth and the results can be further perfected by applying our fruit foot cream.

Fruit foot cream with mango butter and peach kernel oil Creamy, velvety soft foot cream

- with valuable oils made of avocado and peach along with mango and avocado butter
- increases suppleness of the skin
- hyaluronic acid, vegetable glycerine and urea nurture dry, brittle skin and provide for optimal moisture
- the results are well-nurtured, soft feet with skin that is significantly firmer and more elastic
- allow yourself to be pampered with the exotic scent of mango and peach blossoms along with a hint of bourbon vanilla

Use: Apply and massage in well once or twice per day.

fresh feet

The refreshing care trio made for feet!

Fresh feet foot peeling

- high-quality oils and sea salt provide delicate foot care that leave skin feeling smooth and soft
- the intensive care formula comprised of vegetable oils and fats from camellia seeds and evening primrose seeds, almonds, sunflowers, peaches, jojoba, olives and karité imparts moisture to tired, rough and dry feet and supports the regeneration of cracked skin
- pure sea salt from France removes and smooths rough, dry areas and revitalises feet with minerals and trace elements
- the zesty and refreshing scent pampers the senses, creating a completely perfect spa moment

Use: Apply a generous amount to dampened feet, especially on dry and rough areas such as soles and heels, massage in and wash off with warm water; pat dry with a paper towel.

Fresh feet foot mask

- refreshes with an invigorating scent
- an intensive wellness treatment
- the rich foot mask regenerates excessively stressed skin on the feet that is prone to cracking
- avocado oil supports the skin's own protective barrier and added glycerine provides extra moisture
- valuable blue seaweed extract and oils derived from almonds and the seeds of the miracle tree intensively strengthen, nurture and protect stressed feet

Use: Apply a thick layer to the feet. Depending on the skin type, let sit for 5-15 minutes and massage in any residue or remove with a warm, damp compress.

Fresh feet regenerative cream

intensively refreshes and nurtures feet with invigorating scent

- valuable ingredients such as karité, panthenol, squalane and blue seaweed extract impart skin with moisture
- combined with papaya and yarrow extract, this cream ensures extremely soft and smooth feet while also taking care of hard areas and calluses as well as leaving rough and cracked skin smooth and supple
- the light texture of the cream ensures quick absorption by the skin without leaving an unpleasant greasy film on the feet
- the result: soft feet with an excellent degree of care

Use: Apply once or twice per day and massage into the skin in a circular motion, especially on dry areas such as the soles and heels.

Display set for fresh feet regenerative cream

Along with 24 units of 125-ml PEDIBAHR fresh feet regenerative cream, the set also contains a high-quality acrylic display with an insert set for various PEDIBAHR and BAEHR BEAUTY CONCEPT sales products (125 ml / 75 ml)

Herb foot baths (non-foaming) with various additions

For all skin types

Ingredients: (excerpt) herb oil mixture, lavender oil, horse chestnut extract, melissa oil or rosemary oil

Goal of treatment: All herb foot baths are absolutely skin friendly, they maintain the skin's natural protective barrier and they provide care with natural, oil-restoring substances. Bubbling water is particularly effective for releasing essential oils, quickly opening the pores, increasing circulation and stimulating the skin's metabolism.

Use: The herb foot baths are especially well suited for whirlpools without foaming. Add half a cap of bath additive to a foot bath. Stir well to distribute in the water. The ideal water temperature is 36-38°C with a bathing time of 5-10 minutes.

- herb mixture foot bath – stimulating
- lavender foot bath – soothing, nurturing

The pampering programme for stressed feet

Our feet carry the weight of the body. They have to endure many demands on a daily basis. To keep them fit and healthy,

we should take some time each day and allow them to relax. Foot baths revitalise the feet, allowing muscle tension to loosen and promoting the feeling of well-being.

Wellness foot baths and bath salts with the fresh lemon or soft apricot scents offer a high degree of care and ensure relaxation and well-being on account of their valuable ingredients.

Not for use with whirlpools!

Not for use with whirlpools!

Foot bath salt

Relaxation for stressed feet

Apple-kiwi foot bath salt – with a fruity fresh scent

- the combination of active ingredients derived from apple and kiwi fruit extracts as well as jojoba oil and panthenol protects, stimulates and nurtures dry and brittle skin on the feet.

Jasmine-wild rose foot bath salt – an exotically delicate scent experience

- a combination of the active ingredients jojoba, panthenol and a valuable oil derived from the seeds of the musk rose leaves stressed skin on the feet refreshed, manicured and regenerated

Lemongrass foot bath salt – fresh and aromatic scents

- a combination of the active ingredients lemongrass, jojoba and olive oils as well as panthenol regenerate and soothe sensitive skin on the feet

Orange foot bath salt – the pleasure of sunny fresh scents

- an active ingredients complex comprised of orange, almond and carrot extracts provides care, relaxation and regeneration for extremely dry skin on the feet while also improving softness and suppleness

Use: for a relaxing foot bath, add 1 or 2 heaping tablespoons to the bath water.

Not for use with whirlpools!

Art. no.	Product name	Volume
11392	Callus softening gel bottle with pump	500 ml

**Cuticle remover****For the removal of cuticles**

Goal of treatment: Easily and quickly remove cuticles

Use: Apply to cuticles using a brush or a cotton swab. Allow product to briefly absorb and then use a cotton swab to gently push back and remove cuticles. Ready-to-use solution.

Art. no.	Product name	Volume
10509	Cuticle remover bottle	50 ml
10508	Cuticle remover bottle	250 ml

PEDIBAEHR nail softener**Restore softness and suppleness to hard and thick nails**

- also suited for removing excessive cuticles
- allantoin aids in avoiding irritation

Use: Use the pipette to place a few drops onto the nail or cuticle. Allow to absorb for a few minutes and then commence treatment.

Art. no.	Product name	Volume
11387	Nail softener amber glass bottle with pipette	30 ml

Podo liquid with tea tree oil

Made for gentle pre-treatments

- for the targeted preparation of the skin's surface prior to treatment
- an optimal combination of cooling and soothing substances creates a fresh and smooth feeling on the skin
- reduces the sensitivity of the skin's surface
- tea tree oil and lavender oil are deodorising and help to protect the skin
- offers gentle, soothing and nurturing effects
- dermatologically tested

Use: Thoroughly cleanse the targeted areas of the skin, sprinkle on the product and allow to absorb briefly.

Art. no.	Product name	Volume
11377	Podo liquid bottle with dosage tip	30 ml
11373	Podo liquid medical practice bottle with pump	500 ml

Podo liquid intensive

For performing an intensive pre-treatment

- with tansy blossom oil
- targeted and intensive pre-treatment of the skin's surface prior to professional foot care
- facilitates the removal of excessive cuticles
- special combination of cooling and soothing substances
- provides intensive yet gentle, soothing and nurturing effects, reducing the sensitivity of the skin's surface
- dermatologically tested

Use: Thoroughly cleanse the desired area of the skin, sprinkle on product and allow to briefly absorb. Wipe away any product residues after the treatment.

Art. no.	Product name	Volume
11393	Podo liquid intensive amber glass bottle with pipette	30 ml

Post-treatment

Podo fluid with tea tree oil

For performing a gentle post-treatment

- a soothing product for post-treatments following intensive foot care
- nourishes and improves the suppleness of skin
- panthenol, allantoin and tea tree oil soothe and stabilise the skin
- excellent for bothersome calluses, especially on the bottom of the feet
- dermatologically tested

Use: Apply product completely to the treated foot skin surface and massage in well.

Art. no.	Product name	Volume
11378	Podo fluid bottle with dosage tip	30 ml
11372	Podo fluid medical practice bottle with pump	500 ml

Post-treatment

WD ointment with tea tree oil and thyme oil

Prevents skin irritations PZN 871 3834

- ideally suited for preventing irritations through the addition of essential oils, including tea tree oil
- specially made for the nail bed area and for people who suffer from ingrown nails

Use: Apply a layer of WD ointment as thick as the back of a knife to the affected areas and cover with a bandage. For nail folds, we recommend pressing in a generous amount of WD ointment with cotton swab. Repeat in the morning and in the evening.

Art. no.	Product name	Volume
10480	WD ointment tube	30 ml

WD ointment: also optimal for home foot care for those who suffer from ingrown nails

Special solution with 10% propolis, free of fragrances

For intensive skin care

- dermatologically tested

Goal of treatment: The versatile special solution is ideally made for softening corns and calluses. Provides lasting care for the skin between the toes and for nail folds. The solution is also made for soaking tamponades and bandages. Free of preservatives and colouring agents.

Use: Selectively apply to affected areas of the skin. Avoid contact with eyes. Only for external use. May cause allergic reactions.

Ingredients: (excerpt) alcohol, propolis

Art. no.	Product name	Volume
10933	Special solution bottle with dosage tip	30 ml

The special solution with propolis

A versatile special solution with 10% propolis for professional foot care. This special formula is perfectly suited for softening corns and calluses as well as sealing the skin after corn and callus removal. Leaves thickened toenails more elastic while tending to skin between the toes and nail folds. The solution is also made for soaking tamponades and bandages.
